

Water Meter Replacement

Dear Valued Customer,

District contractors will be replacing your property's water meter within the next two weeks, between 8 am - 5 pm. Contractors will not need to enter your home and you do not need to be home during installation.

There will only be about a 15-minute interruption of your water service. Our installation crew will ring the doorbell or knock on the door (if accessible) before water service is interrupted. Be assured that the installer will not shut off the meter if it is showing you're using water.

To assist in the installation process, please be sure your meter box is unobstructed (e.g. no parked cars over meter box).

If your water is cloudy or there's air in the lines after installation, please run your uppermost tub or sink faucet until trapped air is released and your water appears clear.

Please contact Western Municipal Water District at 951.571.7104 with questions or visit wmwd.com.

Thank you.
